POEM IN ENGLISH

WARD MAXWELL

GRASS

grass is unusual  
it was invented by the Romans  
unlike most people grass stays where it grows  
if grass had gone to the moon it would be there today  
because grass looks luxurious  
people put it wherever they can  
a wedge of grass can split a sidewalk  
city block, manhattan skyscraper  
make a dog sick  
step on grass; it deserves it
